

# E/R-Modeling

# UML-Modeling

# E/R-Modeling

An **entity–relationship model (ER model)** is composed of entity types and specifies relationships that can exist between instances of those entity types.

### 1:1 relationship

One student is a leader of one team.  
One team is led by one student.

### 1:N relationship

One location is a birthplace of several persons.  
The birthplace of one person is one location.

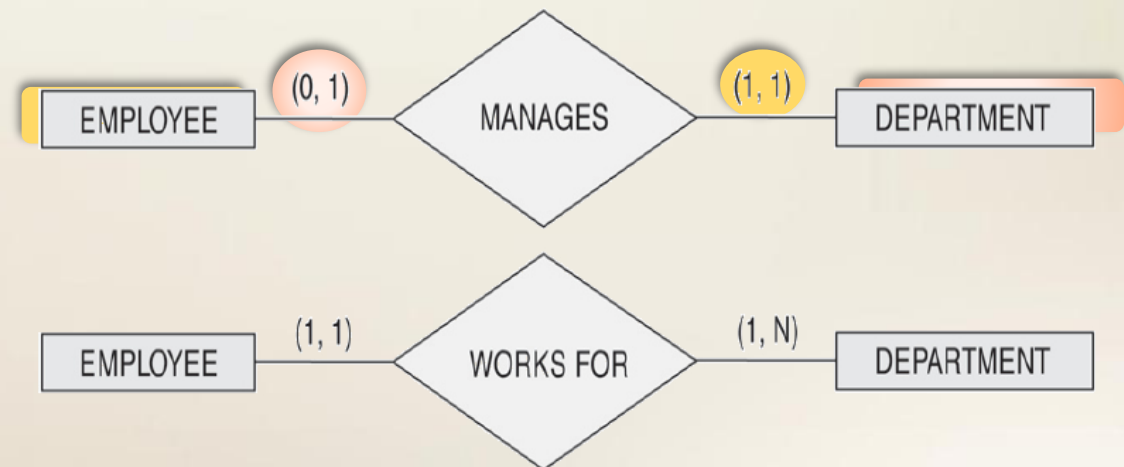

### N:M relationship

One student is a member of several teams.  
One team consists of several students.

### (min, max)-Notation

One employee manages 0 or 1 department.  
One department is managed by exactly one employee.

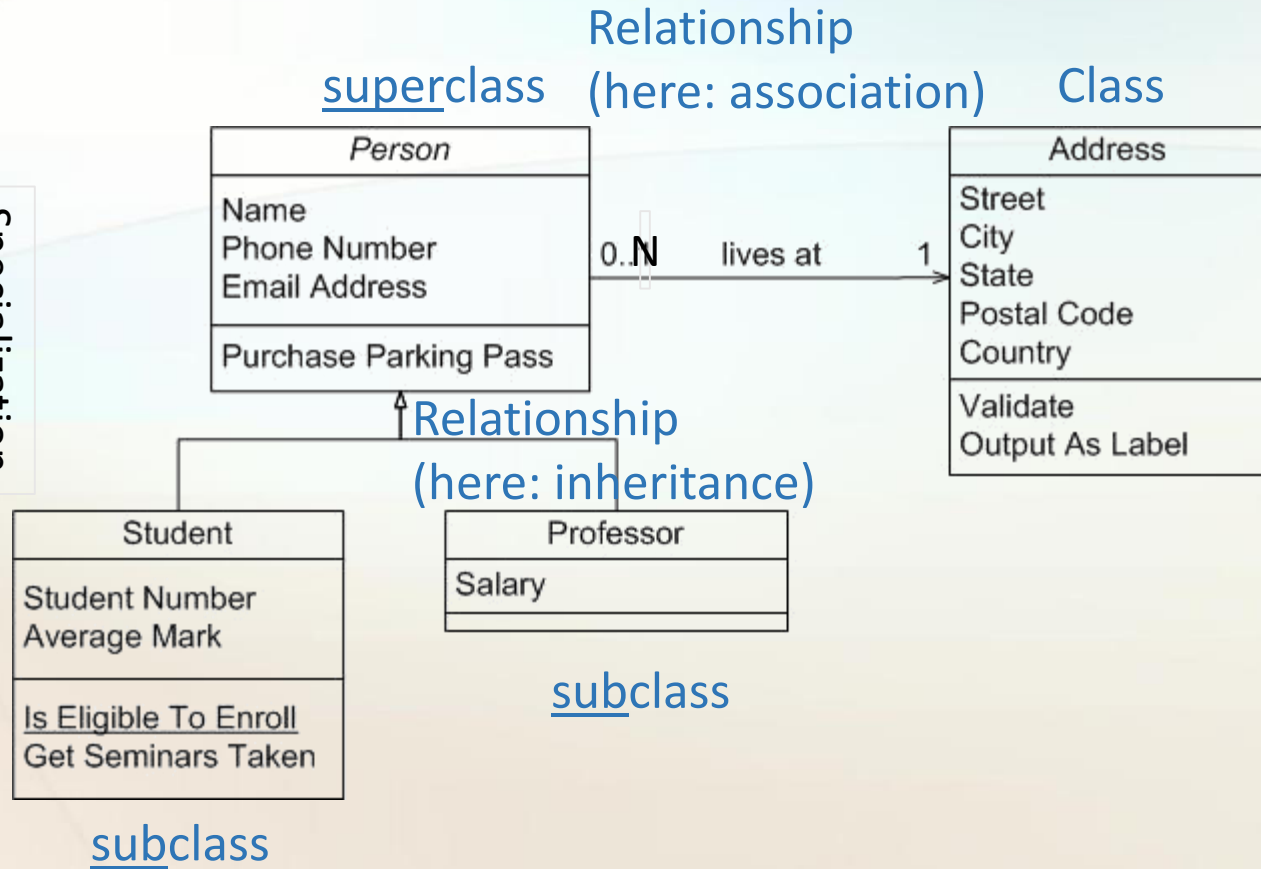

One employee works for exactly one department.  
In one department work(s) from 1 to N employee(s).

# UML-Modeling

Generalization

Specialization

One person lives at one address.  
One address belongs to 0 to N persons.

# Data modeling

| Students |        |
|----------|--------|
| StudNr   | Name   |
| 26120    | Fichte |
| 25403    | Jonas  |
| ...      | ...    |

| attend |            |
|--------|------------|
| StudNr | Lecture Nr |
| 25403  | 5022       |
| 26120  | 5001       |
| ...    | ...        |

| Lectures   |                   |
|------------|-------------------|
| Lecture Nr | Title             |
| 5001       | Grundzüge         |
| 5022       | Glaube und Wissen |
| ...        | ...               |

| Phone book   |             |               |
|--------------|-------------|---------------|
| Name         | Street      | <u>Phone#</u> |
| Mickey Mouse | Main Street | 4711          |
| Minnie Mouse | Broadway    | 94725         |
| Donald Duck  | Broadway    | 95672         |
| ...          | ...         | ...           |

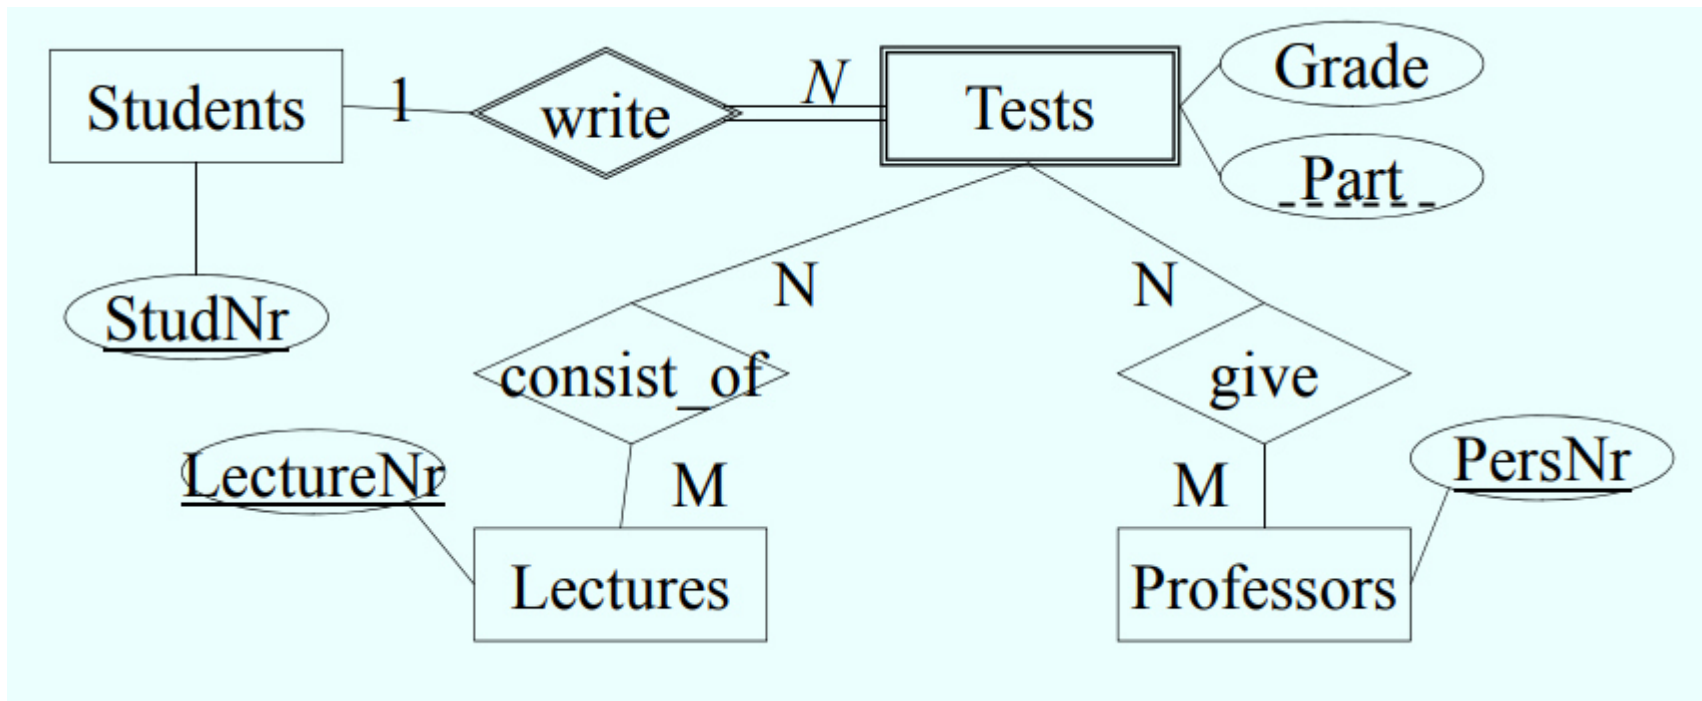

- **Instance:** current state of the data base
- **Candidate Key:** minimal set of attributes whose values uniquely identify a tuple
- **Primary Key:** underlined

| 5049       | Mäeutik           |

# Exercise E/R Modeling

- An employee has a name. A project has a name, a date and a budget. An employee can manage several projects but one project can only be managed by one employee.

# Solution E/R Modeling

# Exercise UML Modeling

- There are two kinds of person (age): Student(id) and Professor (title) which can teach. Each Student can be taught by one or more professors and each professor teaches at least three students.

# Solution UML Modeling
